

### Roof clip

These roof clips are essentially used to fix conductors type 27x2mm tinned copper strip coil and 30x3mm aluminum on zinc cladding or roof by welding.

These pieces are not recommended for stainless steel and a galvanized steel conductor, their rising in temperature on a lightning strike is too important.

The space between each fixing will be determinate according to the applicable installation standard (NFC 17102 or NF EN 62305-3).

### Characteristics

Reference :	<b>AFH0030BF</b>
Type of installation :	Fixing and conductor type strip coil support
Assembly :	Fixing on zinc cladding and roof with welding
Use :	Fixing of the down conductor and equipotential connections
Display :	-
Conductors :	27x2 mm tinned copper strip coils and 33,5x3 mm aluminium
Material :	Brass
Dimensions :	50 x 16 x 8 mm
Weight :	0,006 g
Index of protection :	-
Standards :	NF EN 62561-4

Franklin Technology® - A full range of lightning and overvoltage protection.
